SITUATION SUMMARY

2015 Olympics World Games July 25, 2015 - August 2, 2015, Los Angeles County

- First Lady Michelle Obama attended the Opening Ceremony for the Special Olympics World Games Los Angeles 2015 was held at the Los Memorial Coliseum on Saturday, 07/25/15 at 1700 hours.
- As of 7/25/15 at 2230 hours, the Los Angeles County Sheriff's Department Department Operations Center (DOC) has deactivated without incident.
- The SREOC will remain activated at Level I, normal operational monitoring. The Territory Representative for Los Angeles County will provide support at the Los Angeles County EOC.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- The Lowell Fire on the west slope of the Sierra is burning actively. Smoke from this fire will affect Northeast California. The smoke will likely make it into Truckee and Portola with thinner smoke appearing as haze further east. Limit any outdoor activity and windows closed once the smoke arrives.
- Strong upper level high pressure will gradually build over the Bay Area this week. In addition, offshore flow will develop on Sunday night and decrease later this week. The combination of offshore flow and building high pressure will lead to a few days of above normal temperatures. The warmest interior locations will likely exceed 100 degrees by mid-week. Temperatures will begin to cool late in the week. Sub-tropical moisture returns late in the week bringing muggy conditions back to the Bay Area.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Unseasonably low inland temperatures will continue today as an upper trough slides over the Pacific Northwest. Strong ridging will develop next week which will prolong dry weather and generate hot temperatures for inland areas. Coastal areas should remain slightly warmer than normal with decreasing clouds through the week.

Medford Weather:

A strong level trough will move inland today. This is expected to bring some isolated showers and a slight chance for thunderstorms to the area today. Breezy to windy conditions are expected on the east side this afternoon through late this evening. Humidities are expected to rise enough to prevent red flag conditions.

Reno Weather:

Gusty winds expected this afternoon as a low pressure system pushes south from the Pacific Northwest. These winds may provide locally hazardous boating conditions and isolated fire weather concerns are possible this afternoon. Southwesterly winds associated with the low may also increase smoke transport into the Eastern Sierra today. Building high pressure will bring above normal temperatures midweek, with thunderstorms possible later in the week.

San Francisco Weather:

Slightly cooler-than-normal temperatures are expected once again today. Much warmer weather will develop beginning on Monday as strong high pressure develops aloft and onshore flow weakens considerably. Hot weather is then forecast across inland areas from Tuesday through Thursday with warm conditions expected near the coast. Subtropical moisture may move in from the south towards the end of the week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Dry weather continues except for a slight chance of showers over northern Shasta County late today and tonight. Temperatures below or near normal through Monday then climbing to well above normal Tuesday through the week with triple digit heat returning to the valley.

Hanford Weather:

Clear skies and near normal temperatures will prevail through Monday as a dry westerly flow prevails. A warming trend is expected by mid-week as high pressure strengthens. Tropical moisture will bring increased cloud cover and isolated mountain and desert thunderstorms by the end of the week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A low pressure system passing to the north through Monday will bring night through morning low clouds to the coastal plain while temperatures remain near seasonable levels. Then a high pressure system will build in from the east for above normal temperatures and a chance of thunderstorms and showers on Wednesday and Thursday for Ventura and Los Angeles counties. The storm activity will linger into the weekend for the mountain and desert areas.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A trough of low pressure moving inland through the Pacific Northwest will bring slightly cooler high temperatures with areas of night and morning coastal low clouds and patchy fog.

Southeast California Weather:

Dry westerly flow aloft will keep showers and thunderstorm chances near-zero through Monday. Increasing southerly flow aloft will then gradually increase moisture levels and thunderstorm chances from Tuesday onward through Thursday. High pressure building will then reduce storm chances somewhat through the remainder of the week.

Smoke possible from the Lowell Fire
